Kichler Design Pro LED Linear Installation Instructions

P/N: 12335BK, 12335WH

Dev. No: CP300307BK and CP300307WH

BEFORE INSTALLING:

All installations should comply with national and local electrical codes. If you have any doubts concerning installation contact a qualified licensed electrician.

For use only with listed Kichler LED 24VDC Class 2, 5A MAX power supplies.

Suitable for dry location only.

NOTE: Read all instructions thoroughly before starting installation.

PLEASE SAVE THESE INSTRUCTIONS

1. Turn off power before modifying the system.
2. Determine the desired location for mounting the LED Linear 2-Way Junction.
3. Position the product against the mounting surface.
4. Drive pre-installed screw into mounting surface until product is secure. **NOTE:** DO NOT OVER TIGHTEN SCREWS.
5. Insert installed LED Linear Male Connectors into the 2-Way Junction. **NOTE:** These are polarized connections, if the connector does not fit easily, flip it over and try again.
