Junction Box Specifications

To comply with the National Electric Code (NEC), Kichler Zeo light fixtures require a junction box with a minimum internal volume of 18 cubic inches (in³) for installation (internal volume is typically called out on the inside panel).

The junction boxes listed below meet the minimum requirements. Be sure to select a size and shape that has a depth greater than or equal to the specified minimum depth.

Junction Box Shape and Diameter	4" Square	4" Octagonal	3" Round*	4" Round
Minimum Depth	1-1/2"	2-1/8"	3"	2-1/4"

*Note: Due to the mounting hole configuration in many joist-mounted 3" round junction boxes, square Zeo fixtures (44245, 44247 and 44249) may not mount square with the walls of the room.
